[How To Update Your Apple Mac](#)

I am on a Macbook Pro 13 inch late 2013, my macbook is currently on MacOS High Sierra 10.13.1 I want to update to 10.13.6 so I update through the mac apple store and everything seemed fine and i thought it updated cause it even showed the installing bar and my mac even restarted.. So i opened my macbook, checked the software and it's still on 10.13.1 I try downloading the update through the apple website, but it always shows this 'An error occurred while processing your request.
